SUMMARY

Experienced software engineer with 2 and half years of experience in Java programming and development. Skilled in developing backend software solutions, troubleshooting, and debugging. Proven ability to create and implement software solutions to meet customer requirements.

EXPERIENCE

Java Software Engineer

Capgemini

October 2022 – Present

As a Junior Software Engineer at Capgemini, I collaborate with a skilled team on software solutions for clients. My role includes writing, testing, and debugging code, creating software documentation, and ensuring high-quality software through teamwork. I have gained experience in software development, problem-solving, communication, agile/scrum methodology, and technologies such as Java, Spring Framework, GitLab, Git Flow Workflow, and Maven. My responsibilities involve refining team processes, maintaining documentation, and expanding my technical expertise. I am enthusiastic about continuing my growth with this dynamic company and embracing new challenges to further enhance my skills and knowledge.

Summer Internship

Capgemini

July 2022 – July 2022, Lisboa

• During my internship at Capgemini, I had the opportunity to learn about various departments within the company, as well as get to know some of the clients and team leaders. It was a great learning experience for me to understand how a large consulting firm operates and to see firsthand the different roles and responsibilities of team members. Overall, I enjoyed the internship and gained valuable insights into the industry.

Django Developer

Freelance

March 2022 – October 2022, Lisboa

• I worked as a freelancer and my task was to integrate solutions for a vacation rental company and support the application through the development process using the Django framework. I developed a web site and application using the Python programming language and the Django framework, created forms, managed user input data, and implemented user authentication and authorization. My responsibilities included managing website development projects, including time and budget management. The technologies I used were Python, Django, PostgreSQL, HTML5, CSS, JavaScript, SQLite, and PyCharm.

Java Developer

Freelance Project

September 2021 – January 2022, Lisboa

I leveraged technical skills in Java programming, SQL, and database construction to develop an enterprise application for an elevator company. The application automated task scheduling, resulting in a significant increase in efficiency, while also improving scalability, flexibility, and usability for accurate forecasting and task assignment. The application was deployed using Apache Tomcat and included secure progress logging for both clients and workers. Additionally, I constructed and integrated an Oracle Database into the application to ensure data integrity and quality.

EDUCATION

Bachelor in Computer Science and Business Management.

ISCTE-IUL • Lisboa • 2024

CERTIFICATIONS

Team Working

ISCTE-IUL • 2022

Being certified in team working can be highly relevant in today's job market, as employers often value individuals who can effectively collaborate and communicate with others to achieve shared goals.
